📍 Phaltan, Satara, INDIA

Profile

Over 4 years of experience in managing Stores operations for Finished Goods, Raw Materials, and Packing Materials, including end-to-end Stores activities and audits. Proven track record of completing tasks ahead of deadlines while maintaining high accuracy and efficiency. Seeking a challenging position in an organization where my education and experience can be fully utilized and my quest for knowledge can be satisfied.

Professional Experience

Mahindra Logistics

Executive

11/2024 – Present | Phaltan

Skilled in managing HDR, shelving, and yard area operations, as well as overseeing the full workflow from VTS, GRR, inbound processing to putaway, cycle counts, picking, packing, and outbound dispatch. Adept at working in fast-paced environments, prioritizing tasks effectively, and ensuring smooth supply chain operations. Possess excellent interpersonal skills, strong attention to detail, initiative, and follow-through, with a commitment to optimizing processes and achieving operational excellence. Implemented Packaging Process improvements and supervised complete packaging operation

Supported indirect procurement activities, including RFQ preparation and vendor evaluations. Executed EMF projects by ensuring smooth flow of engineering materials in the warehouse. Collected and maintained master data for each part, including dimensions, packaging, supplier information, and storage locations. Developed and managed PFEP (Plan for Every Part) project plans to ensure delivery of the right part, at the right time, in the right quantity, to the right location, enabling smooth operations. Applied PFEP principles across the end-to-end supply chain for efficient planning, system design, and process management.

Industrial Packers

Executive

03/2022 – 11/2024 | Phaltan

Managed packaging activities, deviations, and downtime while ensuring timely dispatch according to plans. Tracked vehicles and metal skids using ERP integrated with RFID (RTS) and GPS-based returnable packaging solutions. Contributed as part of the Returnable

Tracking System (RFID) development team, understanding and implementing all related processes. Coordinated vehicle arrangements for metal skids to ensure on-time delivery to customers. Built and maintained strong relationships with Cummins India Pvt Ltd, planning and executing overall packaging projects. Monitored RFID compliance across all locations, maintained 5S standards and documentation, and ensured adherence to quality management systems, including customer complaint handling and safety. Prepared daily and monthly MIS reports to track performance and drive improvements.

Varsa Plastic Industries Pvt Ltd

Quality Executive

12/2019 – 03/2022 | Baramati

Ensured product and process quality as a Quality Engineer by conducting in-process testing, verifying operator methods, and preparing daily SPC reports. Coordinated process audits, product audits, 5S audits, and Kaizen activities to drive continuous improvement and reduce in-house PPM. Implemented controls to prevent non-conforming products and production losses, while maintaining compliance with defined processes and shop floor standards.

Essel Marketing Promotions Pvt Ltd

Quality Executive

12/2018 – 11/2019 | Daman

Responsible for inspection and testing of incoming, in-process, and finished products, including mechanical testing, sharp point testing, color testing (Delta machine), smell testing, pad printing, ultrasonic welding, and assembly line documentation. Maintained all departmental quality records and ensured defective materials were stopped at any stage of processing. Identified product, process, and system-related issues, initiating corrective and preventive actions as required. Authorized release of conforming products and controlled, calibrated, and maintained inspection, measuring, and test equipment while maintaining calibration records. Handled customer complaints by identifying root causes, implementing corrective and preventive actions, and ensuring follow-up and closure. Proactively improved productivity, identified abnormalities, implemented fool proofing measures, and consistently achieved departmental targets and deliverables.

Piaggio Vehicles Pvt Ltd,

GET

04/2016 – 04/2017 | Baramati

Followed up with relevant departments to ensure smooth operations and monitored line performance through continuous improvement initiatives. Conducted detailed analysis of in-house defects and customer complaints using CAPA and 7 QC tools, implementing corrective and preventive actions. Planned manpower and trained operators to enhance skills, achieving production targets with quality. Maintained housekeeping discipline and

ensured safety compliance on the shop floor. Participated in daily customer quality meetings to resolve process-related issues and drove problem-solving initiatives with feedback from customers and internal departments. Provided guidance to employees, fostering effective communication and a supportive work environment. Maintained all production-related documentation and system activities.
