ABOUT

Passionate about embarking on a dynamic career journey within an organization that fosters innovation and continuous learning. I am a dedicated and proficient IT professional with specialized skills in Hardware, Networking, CCNA, and Windows Server Administration. With a robust grasp of theoretical frameworks and hands-on experience in implementing solutions, I am poised to contribute effectively to the growth and success of the company.

EDUCATION

Sinhagad Technical Education Society College Of Science, Pune

Aug 2019 – Apr 2022

BBA (CA)- CGPA - 7.92

Pune, India

Trinity College Of Academy engineering

Aug 2023 – May 2025

MCA (Engineering)- CGPA - 6.25

Pune, India

TECHNICAL SKILLS

Networking Protocols: IP addressing, Subnetting, OSPF, EIGRP, BGP, VLANs, STP, and DHCP.

Routing Switching: Static routing, Dynamic routing (OSPF, EIGRP), VLAN configuration, Port Security, EtherChannel.

Network Security: ACLs, basic firewall configuration, VPNs (IPsec, SSL), NS-Principles

Device Configuration Cisco routers switches, NAT (Static, Dynamic, PAT), DHCP, DNS, NTP configuration.

WAN Technologies: basic VPN configuration, Frame Relay.

Wireless Networking: Wi-Fi standards (802.11), WPA/WPA2 security, Access Point configuration.

Network management: network configuration, security management, performance monitoring, capacity planing, problem-solving, communication, project management

Installation: cable installation, hardware setup, device configuration, network topology planning

TRAINEE

Seven Mentors | Cloud Computing Trainee

Sep 2024 - Present

- As a current trainee enrolled in the JK-MCC course, I am actively honing my skills in hardware installation, configuration, and troubleshooting. Through hands-on experience, I am mastering the intricacies of setting up and maintaining various hardware components, ensuring seamless functionality in diverse environments.
- Additionally, my training encompasses networking fundamentals, including designing, implementing, and managing network infrastructures. I am gaining proficiency in key concepts such as DHCP, RIP, OSPF, EIGRP, ACL, NAT, NTP, HSRP, VLANs, and VPNs, essential for building robust and secure network architectures.
- Completed intensive training in Linux systems, mastering command-line operations, file system management. Developed strong proficiency in managing Linux environments, ensuring optimal performance and security.

SOFT SKILLS

- Critical Thinking
- Team Collaboration
- Problem Solving
- Time Management
